

## "Democracy is not what we have. It is what we do."

-- Frances Moore Lappé and Paul Du Bois

**Thank you for being here.** We are showing that the American people will *not* just stand by while our government commits unilateral acts of aggression against another people.

However, if you, like me, are not satisfied with protests – if you are worried that our methods for practicing democracy are no longer serving the will of We The People – if you are looking for a way out of partisan politics – **if you are looking for ways to create a wiser democracy** in which we go beyond conflicted issues to actually solve today's complex problems and create a shared future that we truly want...

**I invite you to help** awaken and empower the wisdom of the people **by learning about and promoting the techniques and tools for deliberative democracy** that are available to us now and are in use around the world.

***“I’ve been involved in social change work for four decades. I and others almost always felt a justifiable sense of urgency. But our short-term focus undermined our ability to see our urgent issues and suffering AS SYMPTOMS MADE INEVITABLE BY DEEPER REALITIES -- realities which could only be addressed with longer-term strategies.***

***I’ve come to believe we’ll only succeed -- in the long haul -- to the extent we apply our energy and attention more strategically, and at deeper levels. I believe more of us need to shift FROM concentration on issues TO focusing on the capacity of society to deal with issues well.”***

***– Tom Atlee, Director of the Co-intelligence Institute***

Hope and hopelessness,  
these are spectator sports.  
Engage, pay attention,  
within your world  
there is a place of action that  
calms and strengthens the heart.  
- JA
